

May 3, 2021

Thank you for your continued support as we all work together to keep our community as safe as possible from COVID-19. We tested 6 people last week and had no new positive results.

At this time, we are still not eating with guests in common areas inside or outside. If your guests or family have been vaccinated, you can order food to go and eat together in your homes. We must do everything to ensure we are not bringing in potential positive cases and eating together when masks are off. Please be patient and know that one day we will be able to eat with families in common areas, but **NOT** yet!

As of this writing, Floyd County's positivity rate is still at 5.3%.

Remember that anyone post-14 days of *both* rounds of the vaccine DOES NOT have to test any longer! Unless you have any symptoms or are in a situation that makes you uncomfortable because of size of event or close proximity to people you do not know, testing is no longer necessary!

The Governor has renewed the Public Health State of Emergency until May 30, 2021. We are looking forward to hearing what he says for our state.

We kindly ask that you direct any questions or concerns to Tracy Cochran at 706-280-2410.

Laurie Steber
Executive Director
